

# METAMAX S-10

## Wetting agent

### Chemical basis:

Alkyl amine

### Characteristics:

Appearance:	yellow, clear, medium viscous liquid
Active matter:	approx. 100%
Solubility:	
Soluble in:	ethanol acetone hexane/heptane

### Shelf-life / Packaging:

12 months if stored under proper conditions  
drums of 30 and 125kg

### Application:

METAMAX S-10 is used on the sector of mixing hard materials, such as for example tungsten carbide with organic solvents such as, ethanol, acetone or hexane/heptane.

METAMAX S-10 can be used as auxiliary for the wet milling process with attritors or ball mills and promotes homogenization and milling of all used components.

The addition quantity in general ranges between 0.2 and 0.5%, related to the dry matter.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
