

# GLYDOL 1144

## Wetting agent / defoamer

### Chemical basis:

Preparation of polymers in solvents

### Characteristics:

Appearance:	colourless liquid
Solubility:	restrictedly watermiscible
Density (20 °C):	approx. 1.02 g/cm <sup>3</sup>
pH (10 %):	approx. 7
Viscosity (20 °C):	approx. 70 mPas

### Shelf-life / Packaging:

12 months if stored under proper conditions  
drums of 5 and 30 kg

### Application:

GLYDOL 1144 is a wetting agent of low solubility that also acts as an anti-foam because it greatly reduces the surface tension of aqueous systems.

The product will be used in applications where low surface tension is demanded in ceramic slips, but foam formation is to be avoided.

The amount added is ca. 0.05 to 0.3 % based on the dry solids content of the composition. GLYDOL 1144 is insoluble in water at higher concentrations and separates out.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
